Origin of cancer:

It is defined as fatal, but the origin when everything really has an origin is unpunished until now to commercialize health and medical bureaucracy, cancer does not really exist if it is not caused by an economic benefit. For doctors, it is not convenient to notify the origin of cancer to corner patients from paying expenses for bureaucratic economic income because patients will always be selective not to want to die. Physical life depends on the organs to stay active, but cigarettes, alcoholic beverages, destroy the organs that cause physical death, lungs and kidneys with legal products. Likewise, legal fatty foods are not food and sugary things will always be deadly because the body is delicate and the organs even more so to not tolerate fat at any time. It is not normal to have two kinds of food in stock, with fat that causes death and organic that does not cause death, the taste of food with the correctly mentioned fat, the taste may be outstanding, but be consumed leads to mortality peaceably have a tasting vice. The food with fat to be consumed is destined to make the effect deadly, because the effect of the food with fat is not momentary because it is mixed with organic ingredients, so the poison of the fat is transmitted to the blood, it is not momentary. Death, not being momentary, convinces the consumer that it does not have a fatal effect and is a staple food and incidentally convinces the victim that the effect is like its taste, cornering physical life with chronic conditions and a deadly cancer. Anything containing fat is deadly, it is legal because governments do yes know that it is fatal in the future, it kills people with obesity, cancer, diabetes, organs. Any food with fat is directed to kill the organs in exchange for its rich flavor, because the organs keep people alive by killing the organs physical life dies. People die of cancer due to a history of consuming fatty food which is not suitable for human consumption, which is why it is fatal. Organic food does not contain this type of mortality because it does not contain fat and is the true food suitable for human consumption. The truth is that cancer is not inherited unless the man has cancer and it is passed to the fetus through semen, then the cancer is inherited, otherwise it is

not, the origin of cancer at birth is due to the consumption of foods with fat absorbed by the fetus, food with fat is not suitable for human consumption. Organic food, because it is suitable for human consumption and does not have any fatal effects, is rarely marketed because it has a balanced flavor, which by consuming organic food keeps the organs and the immune system healthy. Consuming organic food to keep the person healthy for life, reduces the need for visits to the doctor and the economy that is absorbed would decline, which is not convenient for doctors to notify patients of the origin of cancer because it affects the economic bureaucracy of the doctors. The normal thing in life is to experience few health problems when having to consume organic foods that do not have mortality effects and maintain and do not help to eliminate the physical aspect, the consumption of fatty and extra hot foods in this way burns organs and helps the aging of the physical appearance. Consuming foods with oil keeps defenses weak, it is the origin of people constantly getting sick. The symptoms that occur in people who have consumed food with oil due to being victims of commercial advertising animations of foods with oil or its flavor, changing the consumption to organic foods the symptoms are the following. **Dizziness, nausea, vomiting, headache**, these symptoms are because the body is intoxicated, and these symptoms occur because the body is poisoned and intoxicated. These symptoms disappear in a short time once the person is consuming organic food, visits to the doctor are very few times because the body is healthy with complete defenses. Food with oil only pretends to be healthy with food commercials, the truth is not like that, it is deadly and origin of cancer. Where if it takes a long time to disappear is the desire to eat fatty foods, those desires will be very strong in resisting not consuming, but it is because the body is used to it. It will take a time from one to six years for the body and mind to stop having an appetite for oily food, resisting and not being present in places where the smell of oily food is present will be the way to completely disappear this appetite or desire for deadly food with oil. All diseases are hidden when they are not effective in the present, smoking cigarette boxes death is not the present, drinking alcohol, death is not the present, eating fatty foods, death is not the present. Food with oil circulating through the blood and circulating the blood through the organs and the body is the origin of cancer in any part of the body, including brain tumors.

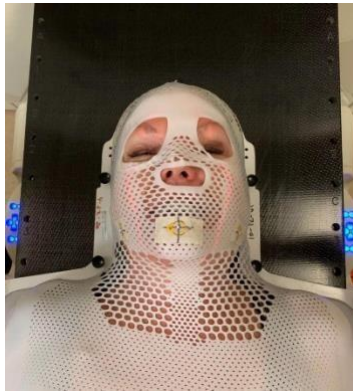

The origin of people feeling bad from time to time is because they have innocently consumed or are consuming food with oil, because this food is deadly, rather it is a sweet poison, sweet because of its good taste, deadly because of its effect. The government is aware that products like alcohol, fatty foods, and cigarettes those products with deadly effects, that is, a sweet poison created by other people kill people, and the government prefers to keep money moved and legalizes them for those reasons, they don't care about the lives of the people who consume them, being secretly victims. All things that appear to be in some forms with nice appearances and turn out to be other mortals and fraud with their effect is to receive victims for their appearance or others. The evidence that its effects are deadly and fraudulent, one of them is fatty foods that hide the deadly effect with a rich flavor. It all starts because money is a fraudulent way of living physical life, that is why it moves forced and only with fabrications that are not natural does money guide people to obtain it, manufacturing fraudulent things. The evidence is the following, **food truck businesses, restaurants, fat food, and alcoholic beverage bars**. They appear to be normal, being a fraud because the politicians founded the money and legalize these businesses regardless of the deadly effects they cause on people, cancer, diabetes, obesity or others. They are types of businesses or sales that only seek to make money, they are not interested in the deadly effect that their sales have on people because money has no feelings. Drugs eliminate the natural functioning of the body by making it only work depending on the drugs. The first times of drug use, the body rejects this toxic consumption, but when people challenge this rejection and continue consuming, they lose control to only consume. When control is lost to only consume, it is because the drugs eliminate the nature of the automatic functioning of the body for the body to work with drugs, that is to say, replacing nature with drugs. It is the origin of seeing addicts on the streets abandoned because they all believed that they had control of drugs, but nobody has control of drugs because drugs eliminate the automatic functional nature of the body that is why nobody has control of drugs, it also causes cancer in different parts of the body. Laws do not protect people's health if they protect people's lives, cigarettes, fatty foods and alcoholic beverages are not legal for sale, chronic disease stocks have the legal origins mentioned above.

The physical evidence of the hidden effects behind:

Products that appear healthy by how they look, but their effect is death from a rich feeling of drugs, alcohol, the taste of greasy foods that are the consequences of consumption that cause cancer and is the origin of cancer. Because the products do not matter if they are legal, but they are not natural and are not natural organic foods. All consumptions that is not natural or organic is in other ways to achieve its deadly effect after consuming them, it does not matter that people continue to feel good, you continue the effect over time creates cancer in any part of the body because the blood is circulating throughout the body.

Cancer fatty food and others:

Cancer alcohol:

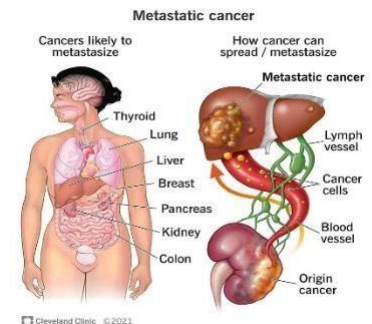

Cancer fatty food:

Cancer drugs and marijuana:

Cancer cigarettes:

Legal product cancer:

All consumptions that is not natural and organic, because people are consuming fraudulent foods that are fatty foods, creates cancer in the person themselves because they are fraudulent foods. And since they are fraudulent, fatty foods are everywhere so that the hidden effect is to force people to consume them because they feel hungry at that moment and the only thing that appears as disposable is fast food, which is also fatty and creates cancer. When you consume fatty foods, the fact that they make you feel good after consuming them is so that you think that the cancer was not the fatty food and it does not do any harm, **lies so that people continue to fall for the fraudulent fatty food fraud.**
